

# Notice of Public Information Centre #3

## Water and Wastewater Master Plan Update

June 10<sup>th</sup>, 2024 5:30-8:00PM

---

The Municipality of Lakeshore is conducting an update to its Water and Wastewater Master Plan (WWMP). The update to the Water and Wastewater Master Plan will ensure proper planning and project guidelines towards the implementation of water and wastewater infrastructure improvements over the next 20 years. This WWMP Update will expand and revise the servicing plan that was adopted in 2018.

The study will be carried out as a Master Plan in accordance with Schedule B Approach #1 of the Municipal Engineers Association's (MEA's) Municipal Class Environmental Assessment (MCEA) Process (MEA 2000, as amended 2007, 2011, 2015, 2023), which is an approved process under the Ontario Environmental Assessment Act. Results from this study will be documented in a Master Plan Project File that will be made available for public review.

### Public Information Centre #3 – Event Details

Your feedback is an important part of the WWMP Update. Lakeshore recognizes that public consultation will be a key component of this project. Accordingly, a public consultation plan has been developed and a set of activities, including three Public Information Centres (PICs), newspaper advertisements, and postings online at [Lakeshore.ca/WWMP](https://Lakeshore.ca/WWMP) has been arranged. Upon completion of the WWMP Update, a Master Plan Project file will be prepared and available for public review.

The first PIC was held on June 28, 2023, and presented background information on the project, an overview of Lakeshore's water and wastewater systems, future needs, and next steps. The display panels that were presented at the PIC #1 can be found on the project website.

The second Public Information Centre was held on November 22, 2023, and presented a summary of project constraints and opportunities, the decision-making process, criteria for identifying alternative solutions, and a preliminary list of identified project alternatives for wastewater treatment and conveyance.

The third PIC will be held at **Lakeshore Town Hall in Council Chambers (upstairs), located at 419 Notre Dame St, Belle River, from 5:30 PM to 8:00 PM on June 10, 2024.** The event will introduce the criteria and process for evaluating the list of identified alternatives presented at PIC 2, and present preliminary recommendations on the preferred alternatives. **The purpose of the PIC is to receive input and comments on the project from interested members of the public. An accessible version of the material will be available upon request.**

### For more information

You can provide your comments, request more information, or register for the project mailing list through the online form on the project website. If you have any additional questions, please contact us:

Notice was first issued on **May 13, 2024.**

### Collection of Information

Personal information collected as part of the Water & Wastewater Master Plan Update process is collected in accordance with the Municipal Act, 2001 and the Environmental Assessment Act to enable the Municipality of Lakeshore to plan for its future water and wastewater infrastructure needs. Any personal information that you include in your feedback will be disclosed to the Province of Ontario. For more information regarding the collection of your personal information, please contact the Corporate Leader - Operations at the information above.

Comments and information that you provide to the Municipality in relation to the Water & Wastewater Master Plan will be included in documents disclosed to the public by the Municipality and by the Province of Ontario. Please take note that if you include personal information in your comments (for example, name, address, phone number, email), this information may be disclosed to the public. By submitting this information, you are consenting to this disclosure.
